Even Number - An integer divisible by 2.

Exponent - Power indicating repeated multiplication.

Expression - Combination of numbers and symbols.

Factor - A number that divides evenly.

Factorial - Product of integers down to 1.

Fraction - Part of a whole.

Frequency - Count of occurrences.

Function - Rule mapping inputs to outputs.

Geometry - Study of shapes and space.

Graph - Visual display of data or relation.

Greatest Common Factor - Largest shared factor.

Hypotenuse - Longest side of a right triangle.

Identity - Equality true for all values.

Inequality - Comparison using $<$, $>$, $\leq$, $\geq$.

Integer - Whole number, positive or negative.

Integral - Area under a curve.

Intersection - Point or set where things meet.

Inverse - Operation that undoes another.

Irrational Number - Nonrepeating, nonterminating decimal.

Isosceles Triangle - A triangle with two equal sides.

Iteration - Repeated application of a process.

Jigsaw puzzle - Shape-fitting spatial reasoning activity.

Kilometer - Metric unit of length.

Least Common Multiple - Smallest shared multiple.

Length - Distance from end to end.

Limit - Value approached by a function.

Line - Straight path extending infinitely.

Line segment - Part of a line with endpoints.

Logarithm - Exponent needed to get a number.

Matrix - Rectangular array of numbers.

Mean - Sum divided by count.

Median - Middle value when ordered.

Mode - Most frequent value.

Multiple - Product of a number and integer.
